

Xingjian Zhang

✉ xingjian.zhang@polytechnique.edu | 📧 @xjzhaang

Research Interests

Computer vision and deep learning for biomedical imaging. Core expertise in AI/ML approaches: microscopy image processing, medical image classification/segmentation, and cellular morphology analysis. Interdisciplinary background bridging machine learning and biomechanics.

Education

École Polytechnique, Institut Polytechnique de Paris

Ph.D. candidate in AI for Biomechanics

M.S. in Mechanics - Biomechanics and Biomedical Engineering

B.S. in Computer Science and Mathematics

2023 - Present

2021 - 2023

2018 - 2021

Experience

PhD candidate | *LadHyX, École Polytechnique & LTCI, Télécom Paris*

Nov 2023 - Present

- **Conducting** deep learning research to study cellular nuclear deformations on microgroove substrates to develop a functional in-vitro diagnostic tool for laminopathies and breast cancer.
- **Contributing** to collaborative research projects across domains including 4D MRI flow modeling, tabular machine learning on surgery data, and spatial-temporal imaging integration.
- **Teaching** assistance in master-level (Deep Learning, Medical Imaging, Object Recognition) and bachelor-level (Machine Learning, Web Programming) courses at Télécom Paris and École Polytechnique.
- **Supervising** M2 research projects on computer vision topics at Télécom Paris.

Deep Learning Intern | *Dassault Systèmes*

Mar 2023 - Sep 2023

- **Conducted** research in 3D tumor segmentation for the TwinOnco project, advancing beyond existing methods that relied on 2D slice segmentation and aggregation.
- **Designed and implemented** deep learning models to segment tumor boundaries in complex medical imaging datasets in 3D.

Research Intern | *LOB, École Polytechnique*

Apr 2022 - Mar 2023

- **Developed** segmentation algorithms for axons and dendrites in noisy THG microscopy images of mouse cerebellum.
- **Created** a computational model to quantify muscle fiber orientations from pSHG microscopy of protein organizations in zebrafishes.
- **Developed** BiolImageLoader, a Python library providing a unified interface for bioimage datasets in machine learning applications.
