

Xingjian Zhang

✉ xingjian.zhang@melix.org | 📧 @xjzhang

Research Interests

AI/ML methods for multimodal data analysis and pattern recognition. Experience with biomedical imaging, time series analysis, and medical data processing using deep learning approaches. Interested in AI biomedical research and applications in other data-driven research domains.

Education

École Polytechnique, Institut Polytechnique de Paris

Ph.D. candidate in Biomedical Engineering (AI bioimaging)

2023 - Present

- Advisors: Abdul I. Barakat (École Polytechnique), Elsa D. Angelini (Télécom Paris)

M.S. in Mechanics - Biomechanics and Biomedical Engineering

2021 - 2023

B.S. in Computer Science and Mathematics

2018 - 2021

Experience

PhD candidate | LadHyX, École Polytechnique & LTCL, Télécom Paris

Nov 2023 - Present

- Conducting** deep learning research to study cellular nuclear deformations on microgroove substrates to develop a functional in-vitro diagnostic tool for laminopathies and breast cancer.
- Worked on** collaborative research projects across domains including 4D flow MRI modeling and ML on tabular surgery data (Marie Lannelongue Hospital), time-series electrical impedance data (Sensome), and skin conductance data (EloCare, NUS).
- Teaching** assistance in master-level (Deep Learning, Medical Imaging, Object Recognition) and bachelor-level (Machine Learning, Web Programming) courses at Télécom Paris and École Polytechnique.
- Supervised** M2 research projects on computer vision topics at Télécom Paris.

Research Engineer Intern | Dassault Systèmes

Mar 2023 - Sep 2023

- Conducted** deep learning research in 3D tumor segmentation on CT scan data for the TwinOnco project, advancing beyond existing methods that relied on 2D slice segmentation and aggregation.

Research Intern | LOB, École Polytechnique

Apr 2022 - Mar 2023

- Developed** segmentation algorithms and computational models for pSHG and THG imaging.
- Developed** BioImageLoader, a Python library providing a unified interface for bioimage datasets in machine learning applications.

Selected Presentations

- "Deep learning classification of laminopathy mutations on microgroove substrates", *ESB 2025 Congress*, Zürich, Switzerland (Oral)
- "Myoblast mutation classification via microgroove-induced nuclear deformations", *MIDL 2024*, Paris, France (Poster)
- "Interpretable exact linear reductions via positivity", *CMSB 2021*, Bordeaux, France (Oral)

Skills

Programming: 🐍 Python, 🟢 Julia, 📊 R, 📐 Matlab, 🌐 C/C++, 📄 JavaScript/HTML/CSS

ML and MLOps Tools: 🍷 Pytorch, 📦 TensorFlow, 📦 JAX, 📦 Git, 📦 Docker, 📦 PySpark, 📦 SQL, 📦 Pandas, Multi-GPU training

Languages: Chinese (native), English (C2), French (B2)
